STATISTICAL ABSTRACT OF DELHI 2014

Directorate of Economics and Statistics

Vikas Bhawan-II, 3rd Floor (B-Wing), Bela Road, Delhi-54

GOVERNMENT OF NATIONAL CAPITAL TERRITORY OF
DELHI

STATISTICAL ABSTRACT OF DELHI
2014

DIRECTORATE OF ECONOMICS & STATISTICS
VIKAS BHAWAN-II, IIIRD FLOOR 'B' WING,
BELA ROAD, NEAR METCALF HOUSE,
DELHI- 110054.

PREFACE

The present Statistical Abstract 2014 is the Seventh in the series brought out by this Directorate on the basis of secondary data sources. The uniqueness of Statistical Abstract is that it contains time series data on various socio-economic parameters and serves as an effective quantitative tool for reaching to logical conclusions in the context of planning and public policy making.

The present edition of Statistical Abstract is thoroughly improved in terms of coverage and quality. The broad subjects covered include population, data on different sectors of the economy, namely, agriculture, industry and infrastructure sector, economic indicators like Gross State Domestic Product & Per Capita Income, level & pattern of household consumer expenditure, poverty, prices etc. This publication has taken care to include information on social welfare aspects. Data of other states/UTs has also been presented in respect of select indicators for comparison purpose.

The report has been prepared by Planning & Coordination unit of this Directorate under the guidance of Dr. R.N. Sharma, Joint Director and Dr. Shikha Anand, Deputy Director. The preparation of the Abstract was supervised by Mrs Sunita Jain, Assistant Director and Sh. Ashish Verma, Statistical Officer. The special effort made by Mrs Neetu Bharti and Mrs. Mamta Rani, Statistical Assistants to bring out this report deserves special appreciation. The Directorate is indebted to all the departments/offices/organizations for extending active co-operation by providing requisite data. Suggestions, if any, for the improvement of the future versions of the report are welcome.

Place: Delhi

- Houseless & Households Population 2011
- No. of Houses & Households and their Amenities 1991 & 2011
- No. of Villages in Delhi according to 1921 to 2011
- Population Projections of Delhi 2002 & 2026
- Migrant Population in Delhi
- Population in selected cities of India 1981 to 2011
- Key indicators of Population -India and States 2001 & 2011

CHAPTER 1: AREA & POPULATION

In context of Delhi, the literal meaning of population is “the whole number of people or inhabitants in the state”. Populations are affected by many factors, the main natural ones being birth rates and death rates which affect the level of natural change (increase or decrease) within the population. Other factors that affect the change in a population’s growth include the impact of urbanisation, emancipation of women, agricultural changes and education.

This Chapter presents an analytical view with respect to the population of Delhi with the help of statistical as well as pictorial depictions of the related aspects and outcomes.

POPULATION OF DELHI

After independence Seventh Population Census was undertaken in the entire area of NCT of Delhi between 9th February to 28th February 2011 with a provisional round from 1st to 5th March, 2011. As such, the population of Delhi, as on 1st March, 2011, has been worked out at 16.79 millions as against 13.85 millions as on 1st March, 2001. This reflects decennial growth of 21.2% of population after 2001 census. The corresponding percentage at All-India level has been worked out at 17.7%. The total population of Delhi is 1.39% of the All-India Population. Figures at a glance – Population characteristics 2011 are given in Table 1.1. Decennial Population Growth Rate in Delhi is given in Table 1.2.

AREA OF NCT OF DELHI

The total area of NCT of Delhi is 1483 Sq. Kms. As per Population **Census 1991**, its rural and urban composition is given below:

Rural Area : 797.66 Sq. Kms.

Urban Area : 685.34 Sq. Kms.

1483.00 Sq. Kms.

During Population **Census 2001**, the area of NCT of Delhi has remained the same at 1483 Sq. Kms. However, its rural-urban composition has undergone change due to

urbanisation of villages. According to the estimates of Directorate of Census Operations, Delhi, its rural-urban break-up of NCT of Delhi is given below:

Rural Area	:	558.32 Sq. Kms.
Urban Area	:	924.68 Sq. Kms.

1483.00Sq. Kms.		

According to Population **Census 2011**, the area of NCT of Delhi has remained the same at 1483 Sq. Kms. However, its rural-urban composition has undergone change due to urbanization of villages. According to the provisional estimates of Directorate of Census Operations, Delhi, its rural-urban break-up of NCT of Delhi is given below:

Rural Area	:	369.35 Sq. Kms.
Urban Area	:	1113.65 Sq. Kms.

1483.00Sq. Kms.		

AVERAGE ANNUAL EXPONENTIAL GROWTH RATE OF POPULATION IN DELHI

The annual average exponential growth rate of population of Delhi was the highest (6.42%) during 1941-1951 due to large scale migration from Pakistan to India after partition in 1947. Since then the annual growth has been recorded 4.22 % during 1951-1961, 4.25% during 1961-1971, 4.25% during 1971-1981, 4.15% during 1981-1991 and 3.85% during 1991-2001. The annual growth rate of population of Delhi during 2001-2011 has been recorded as 1.92%

CHAPTER TWO

CLIMATE & RAINFALL

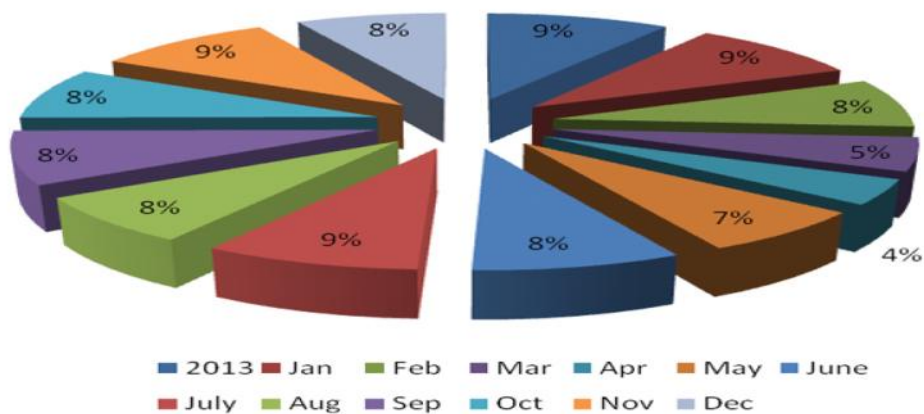

- Monthly and Annual Temperature/Humidity
- Monthly and Annual Rainfall

CHAPTER 2: CLIMATE & RAINFALL

Delhi has an extreme climate. It is very hot in summer (April - July) and cold in winter (December - January). The average temperature can vary from 25°C to 45°C during the summer and 22°C to 5°C during the winter. The city witnesses an average rainfall of 101.26 mm in Delhi during 2013.

This Chapter presents data on monthly and annual Temperature/Humidity. Monthly & annual rainfall is recorded by the Regional Metrological Deptt, New Delhi. Daily rainfall is recorded at 08:30 IST

**MONTH WISE RELATIVE Humidity (%)
During 2013**

Month wise Max & Mini Temperature during 2013 (C)

CHAPTER THREE

AGRICULTURE & LIVESTOCK

- Pattern of land utilization
- Area under Principal crops
- Production of Principal crops
- Average Yield of principal crops
- Average price of selected Agriculture commodities during peak season
- Source of Irrigation & Irrigation Area
- Live Stock-Number of cattles
- Veterinary Facilities
- Activity of Delhi Milk Scheme
- Activities of Mother Dairy

CHAPTER 3: AGRICULTURE & LIVESTOCK

In Delhi, Agriculture comprises agriculture proper, livestock and livestock products and operation of irrigation system.

The economic activities included in agriculture proper are (i) growing of field crops, fruits, nuts, seeds, and vegetables, (ii) management of tea, coffee and rubber plantations, (iii) agricultural and horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, operation of tobacco for marketing, pest control, spraying, pruning, picking and packing and (iv) ancillary activities of cultivators such as gur making, transportation of own produce to primary markets, activities yielding rental income from farm building and farm machinery.

Livestock and livestock products include breeding and rearing of animals and poultry besides private veterinary services, production of milk slaughtering, preparation and dressing of meat, production of raw hides and skins, eggs, dung, raw wool, honey and silkworm cocoons etc.

This chapter contains tables regarding pattern of Land utilization, Area, Production and Yield per hectare of principal crops in Delhi, production of principal crops, Average Agricultural commodities during peak season besides irrigation and irrigated Areas. The said data is presented in tables 3.1 to 3.6 and the source of information is Agricultural Deptt, Govt. of National Capital Territory of Delhi.

The Statistics of live stock and Poultry, veterinary facilities, activities of Delhi Milk scheme and Mother Dairy are included in this section. The said data are supplied by Animal Husbandry Department, Govt. of National Capital Territory of Delhi, and Delhi Milk Scheme & Mother Dairy respectively.

CHAPTER 4:PRICE & PRICE INDICES

Prices affect all sections of society and as such price Statistics are regarded as most important economic data reflecting changes in the economy of a country. Their influence is on a wide range of economic activities and a constant watch on prices become necessary for the operation and regulation of economic policies as well as for the purpose of Planning and Policy formulation.

The price statistics are extremely useful in a number of ways as will be clear from the following points:-

1. Price Statistics are useful to the Govt. and the private employers for adjusting wages and salaries of the employees.
2. Price data are needed to control prices of commodities.
3. Price data are needed in order to evaluate the terms of trade.
4. Price data reveal the inflationary and deflationary pressures and help in taking suitable corrective action.
5. These are useful in evolving a suitable price policy.

WHOLE SALE PRICES (WPI)

It is a general purpose index to measure the variations in the whole sale price levels in the state with base year 1999-2000=100. It covers 18 commodities for which prices are collected from different markets of Delhi. Table no. 4.1 presents average wholesale prices of the commodities form 1999 to 2013; while Index numbers of wholesale prices in India with base year 2004-05= 100 present in Table no. 4.5

The Wholesale prices are collected by Agricultural Marketing, Delhi, while index no. is prepared by Ministry of Commerce Industry.

CONSUMER PRICE INDEX (CPI)

The Labour Bureau Shimla has been compiling and releasing regularly the monthly Consumer Price Index Number for Industrial Workers which is one of the important economic indicators of inflationary measures in the country. The index measures the overall changes in the level of average retail price of a fixed set of goods and services consumed by the target population. The base year of the current CPI for industrial workers is 2001=100. The source of weights for this index is a family living survey, which includes the whole centre of Delhi.

The Index Number is compiled for following major groups:-

- (1) Food
- (2) Pan, Supari, Tobacco and Intoxicants
- (3) Fuel and Light
- (4) Housing
- (5) Clothing, Bedding & Footwear and
- (6) Miscellaneous

Table 4.2 contains Group-wise CPI for Industry Workers in Delhi from 1980 to 2013 while table 4.3 presents Group/Sub-group wise CPI for Industrial workers in ratio of All India & 4 metro cities. Table 4.4 contains Annual average CPI for some selected centers of India.

CHAPTER FIVE

INFRASTRUCTURE

- Electricity Generation
- Electricity Consumption
- No. of electricity consumers category wise
- No. of water consumers category wise
- Length of roads
- No. of Registered Motor Vehicles
- Percentage distribution of registered vehicle to the total
- Working of Delhi transport corporation
- Post offices and Telephone connections

CHAPTER 5:INFRASTRUCTURE

Infrastructure is basic physical and organizational structures needed for the operation of a society or enterprise, or the services and facilities necessary for an economy to function. It can be generally defined as the set of interconnected structural elements that provide framework supporting an entire structure of development. It is an important term for judging a state's development.

The term typically refers to the technical structures that support a society, such as roads, water supply, sewers, electrical grids, telecommunications, and so forth, and can be defined as the physical components of interrelated systems providing commodities and services essential to enable, sustain, or enhance societal living conditions.

ELECTRICITY

This Section contains the data regarding generation and consumption of electricity in the state. Given tables pertain to Electricity Generation, Electricity Consumption and number of Electricity Consumers category wise. Data is provided by Delhi Electricity Regulatory Commission (DERC).

WATER

This section includes the table regarding no. of water consumers category wise (Domestic and Commercial / Industrial), no. of metered and unmetered connections year wise. Source of information is Delhi Jal Board.

ROADS & TRANSPORT

The data contained in the table relates to the roads maintained and constructed by MCD, NDMC, Delhi Cantonment Board and Public work Department (Includes National Highways and Other roads) which is provided by Local Bodies & PWD Deptt.

Data on Motor Vehicles and road accidents is provided by office of the Commissioner of Transport and Delhi Police respectively. The information on road transport (no. of buses, buses on road, Daily average passengers in lakhs, Inter state bus routes, workshops, depots) has been given by the Delhi Transport Corporation.

COMMUNICATION

The data relating to the no. of Post offices, Telephone connections and Telegraph offices has been supplied by the Ministry of Communications, Deptt. Of Post and Telecommission (SST Section).

TRADE, COMMERCE & INDUSTRIES

- Distribution of registered companies and their brief features
- Major activity wise distribution of newly registered companies
- Annual survey of Industries
- Index. No. of Industrial Production
- Registered Dealers & Receipts under Sales Tax Act in Delhi
- District wise distribution of Establishment in Delhi
- Distribution of Establishment by major activity group – Economic Census
- Unorganized Manufacturing Activities in Delhi
- Un – organized Manufacturing Enterprises & Employment
- Unorganized Service Sector Employment
- Unorganized Service Sector Enterprise

CHAPTER 6: TRADE, COMMERCE & INDUSTRIES

Trade refers to the act or process of buying, selling, or exchanging commodities, at either wholesale or retail, within a country or between states.

Commerce is the whole system of an economy that constitutes an environment for business. This is in contrast with business, the value-creating activities of an organization for profit. The system includes legal, economic, political, social, cultural, and technological systems that are in operation in any country. Thus, commerce is a system or an environment that affects the business prospects of an economy or a nation-state. We can also define it as a second component of business which includes all activities, functions and institutions involved in transferring goods from producers to consumer.

Industry is the production of an economic good or service within an economy. Industry is often classified into three sectors: primary or extractive, secondary or manufacturing, and tertiary or services.

Industries can be classified on the basis of raw materials, size and ownership.

- **Raw Materials:** Industries may be agriculture based, Marine based, Mineral based, Forest based.
- **Size:** It refers to the amount of capital invested, number of people employed and the volume of production.
- **Ownership:** Industries can be classified into private sector, state owned or public sector, joint sector and co-operative sector

In this chapter, an analysis of the subject has been attempted with the help of statistical presentation of the elements constituting the Trade, Commerce & Industries.

JOINT STOCK COMPANIES

Data regarding Companies are collected under the companies act, 1956 by Deptt. Of Company Affairs, Government of India. This section includes the information about no. of companies and their capital activity wise distribution of newly registered companies are also presented in this section. Data is provided by Deptt. Of Company Affairs, Govt. Of India.

INDUSTRIES & TAX

The data regarding No. of registered factories, their Productive Capital (Fixed and Working), total No. of Employee and their emolument is present in table 6.3 while table 6.4 includes Index number of industrial Production (General Index, Manufacturing and Electricity). Data is provided by DES relates to the period from 1980-81 till now.

Information regarding total number of Registered dealers under Local and Central Act, Receipts of Local sales tax and Central sales Tax is given in Table No. 6.5 and the source of information is Trade & Taxes Deptt. Of GNCTD.

ECONOMIC CENSUS

The Fifth Economic Census in respect of NCT of Delhi was conducted under the aegis of Directorate of Economics & Statistics. Economics Census is the complete enumeration of entrepreneurial activities operating in the geographical boundaries of State/ Country at a given point of time to come out with the official count of establishments and their characteristics. Fifth & Sixth Economic Census briefly includes all types of entrepreneurial activities in the field of agriculture (except crop production and plantation) as well as non- agriculture. Entrepreneurial activities mean, all those economic activities dealing with the production or distribution of goods/services not solely for the purpose of own consumption. The result of 6th Economic Census are shown in table 6.6 while table 6.8 presents the NSS 62nd Survey Results of un-organized Manufacturing Activities. This data is provided by Directorate of Economics & Statistics, Govt. of NCT of Delhi.

CHAPTER EIGHT

ECONOMIC INDICATORS

- State Domestic Product & related aggregates
- Gross State Domestic Product by broad Economic Activity
- Net State Domestic Product by broad Economic Activity
- Percentage Distribution of GSDP by economic activity at Constant Prices 2004-05
- Percentage Distribution of NSDP by economic activity at Constant Prices 2004-05
- State/UT Per capita Income
- Monthly per capita Expenditure
- Selected Economic(Poverty) Indicators of States / UT

CHAPTER 8: ECONOMIC INDICATORS

State Income of Delhi and its contributory elements can be considered as effective indicators of the economy of the State.

The estimates of State Domestic Product are prepared for all the sectors of economy both in terms of Gross and Net basis. The difference between the two is that in the gross estimates, no deduction is made for Consumption of Fixed Capital (CFC) which takes place in the process of production, whereas in the net estimates, CFC is subtracted from the gross value figures. Net State Domestic Product is also called State Income.

For the purpose of estimation of SDP, the whole economy of the state has been divided into seventeen (17) sub-sectors in conformity with the procedure followed at the national level to estimate the National Income estimates. The procedure is followed by each state and union territory of the country to make the estimates comparable. The fourteen sectors have been further categorized into three broad sectors as follows.

(i) Primary Sector

- Agriculture and Livestock
- Forestry and logging
- Fishing
- Mining and Quarrying

(ii) Secondary Sector

- Manufacturing (Registered)
- Manufacturing (Un-Registered)
- Electricity, Gas and Water Supply
- Construction

(iii) Tertiary Sector

- Trade, Hotels and Restaurants.
- Railways
- Transport by Other Means
- Storage
- Communication
- Banking and Insurance
- Real Estate, ownership of dwellings, business and legal services
- Public Administration

- Other services

The estimates of State Domestic Product (SDP) of the National Capital Territory of Delhi are prepared at current and constant prices by the Directorate of Economics & Statistics, Delhi. The estimates of SDP at current prices are obtained by evaluating the product at current prices prevailing during the year. The estimates of SDP at current prices, over the time do not reveal actual economic growth because these contain the combined effect of (i) the changes in volume of goods and services and (ii) the changes in the prices of goods and services. In order to eliminate the effect of price changes/inflation, the estimates of SDP are also prepared by evaluating the goods and services at the prices prevailing in the fixed year known as base year and are known as the estimates of State Domestic Product at constant prices. (i.e. 2004-05 prices)

This chapter deals with information pertaining to State Income by Industry at current prices and at constant (2004-2005) Prices.

Broad Economic Activities are divided into three sectors namely.

- I. The Primary sector includes Agriculture and allied activities, Mining & quarrying.
- II. The Secondary sector includes Manufacturing, Electricity, Gas, Water, Supply and Construction Sector.
- III. The territory sector includes Trade, Hotel and Restaurants, Transport storage & Communications, Finance, Insurance, Real Estate/ Business services, Community, Social & Personal Services.

Table 8.1 to 8.5 presents GSDP/NSDP by Broad Economic Activity at current and constant prices while table 8.6 & 8.7 presents per capita income & monthly per capita expenditure in Delhi with comparison to other states respectively. Table 8.7 presents the population below poverty line. Data is compiled and provided by DES.

Notes:

1. Population as on 1st March 2012 has been used for estimating number of persons below poverty line. (2011 Census population extrapolated)
2. Poverty line of Tamil Nadu has been used for Andaman and Nicobar Island.
3. Urban Poverty line of Punjab has been used for both rural and urban area of Chandigarh.
4. Poverty line of Maharashtra has been used for Dadra & Nagar Haveli
5. Poverty line of Goa is used for Daman & Diu.
6. Poverty line of Kerala has been used for Lakshadweep.

CHAPTER NINE

EDUCATION

- General Education - Education Institutions
- Enrollment In Educational Institutions
- Teachers In Educational Institutional
- State/UT Wise Gross Enrollment Ratio In Schools For General Education(2006-2007)
- State/UT Wise Dropout Ratio In Schools For General Education(2006-2007)
- Results Of Central Board Of Secondary Examination In Delhi & India
- Higher Education - Number Of Higher Education Institutions
- Teaching Faculty in Higher Education
- Enrolment in Higher Education
- Technical/Vocational Training – No. of Institutions
- Enrolment in Technical/Vocational Training
- Number Of Instructors in Technical/Vocational Training
- Literacy Rate For Delhi

CHAPTER 9: EDUCATION

Education holds the key to economic growth, social transformation, modernization and national integration. The National Policy on Education formulated in 1986 and modified in 1992 aims to provide education of a comparable quality up to a given level to all students irrespective of their caste, creed residence or sex. It aims at promotion of a national, a sense of common citizenship and composite culture and strengthening national integration. It lays stress on the need for a radical transformation of the education system to improve its quality at all stages and gives much greater attention to Science and Technology. All children are proposed to be provided free and compulsory education up to 14 years of age.

This section describes the educational development in Delhi. Tables given in this section contain data regarding general education, higher education, technical/vocational training and literacy rate of Delhi.

GENERAL EDUCATION

This section present tables regarding number of schools, number of enrolment, Teachers employed in the primary, middle & sec. /sr. secondary school of Delhi for the year 2001-02 to 2013-14. Information regarding State/UT wise Gross Enrollment Ratio for classes I-V, VI-VIII and IX-XII during the year 2010-11. State/UT wise Dropout Ratio in Schools for classes I-V, VI-VIII and IX-XII during the year 2010-11 is also presented in this section. Literacy rate of Delhi was 81.67 % as per 2001 Census has increased to 86.2% as per 2011 Census. The source of this data is Dte. of Education and Ministry of HRD, Govt. of India respectively.

HIGHER EDUCATION AND TECHNICAL/VOCATIONAL TRAINING

Available information in this section is regarding No. of Colleges, Universities, Teaching Faculty & No. of Students enrolled for Education. This information is provided by Dte. Of Higher Education, GNCTD. Apart from this the data source for vocational training in Delhi is Dte. Of Training and Technical Education GNCTD.

- Occupational Distribution Of Registered Applicants In Employment Exchange
- Educational Classifications Of Applicants Registered In Employment Exchange
- Labour Welfare- Minimum Rate Of Wages In Scheduled Employments
- Number Of Trade Unions & Industrial Disputes
- Child Labour

CHAPTER 10: LABOUR & EMPLOYMENT

The main function of the Directorate of Employment, GNCT of Delhi is to render employment service to the job-seekers, job-providers and all other concerned through its 9 District Employment Exchanges /02 Special Employment Exchanges for PH & 1 Special Employment Exchange for Ex-Servicemen, UEI&GB located at University of Delhi, Jawaharlal Nehru University and Jamia Millia Islamia University. This includes online registration of the job-seekers, updation /modification of their registration, receiving of the requisition of vacancies from the employers and sponsoring the names of registrants as per the requirements of the job providers for employment. Besides, this Directorate is also providing vocational guidance/skill development training to the job-seekers.

This section describes the employment and unemployment condition in Delhi. The table under this section presents Survey reports of various NSS rounds on Employment & Unemployment in Delhi and distribution of workers by major economic activity and no. of workers etc. as per Economic Census. As the part of Administrative statistics tables regarding number of employees working in Govt. of N.C.T. of Delhi, Autonomous bodies and local bodies have been included in this section. The data is provided and compiled by DES, Delhi.

NATIONAL EMPLOYMENT SERVICE

This section presents data regarding number of employment exchanges, number of Registration and vacancies notified. The source of information is Dte. Of Employment, GNCTD.

LABOUR WELFARE

The statistics under this section pertaining to minimum rate of wages in Scheduled Employment, no. of Trade Unions & Industrial Disputes. Information on Child Labour in Delhi with comparison to other states is also included in this section. Source of information is Labour Deptt. GNCTD AND Census of India-2001

CHAPTER ELEVEN

HEALTH INDICATORS

- Distribution Of Health Institutions
- Number Of Dispensaries
- Selected Vital Rates Of Delhi
- Major Causes Of Deaths
- Family Welfare Programmes
- Immunization
- District Wise Disabled Population In Delhi-2011
- Aged Population In Delhi
- State/UT Wise Selected Vital Indicators
- Total Fertility Rate (15-49)
- State wise Proportion Of Aged Persons, Dependency Ratio

CHAPTER 11: HEALTH INDICATORS

In Delhi, health care facilities are being provided by both Government & Non-Government Organizations. Among the Government Organizations, Directorate of Health Services (DHS) of Government NCT of Delhi is the major agency related to health care delivery. The DHS is also the largest department under Department of Health and Family Welfare, Govt. of NCT of Delhi providing health care facilities at primary and secondary level to the citizens of Delhi through various types of health outlets, spread all over Delhi viz. Dispensaries and Health Centres, School Health Clinics and Mobile Health Clinics.

Health Statistics of Delhi is presented in this section. Data regarding number of Health Institutions and No. of Dispensaries is shown in table 11.1 & 11.2 respectively. Besides this different health indicators in Delhi with comparison to other states are presented in table no. 11.11. Information is received from Dte. Of Health Services GNCT of Delhi and Office of Chief Registrar (Births and Deaths) Delhi.

- Social Defence Programme
- Child Welfare
- Social Security/Others
- Scheme for Society
- Welfare Of Physically Handicapped(Ph)
- Slum & JJ Clusters Welfare
- Public Distribution System In Delhi

CHAPTER 12: WELFARE STATISTICS

The Department of Social Welfare provides welfare programmes and services to the handicapped persons, social security for the aged and destitute through the network of residential care homes and non-institutional services. Besides this the Department also provides avenues of handicapped and creates awareness amongst general public regarding the welfare measures of the Department.

The Department was established in 1962 and discharges the important responsibilities of managing the Public Distribution of, and trade and commerce in essential commodities with a view to maintain or increase supplies thereof and secure their equitable distribution and availability at fair prices by enforcing the Essential Commodities act, 1955 and various Control Orders made thereunder.

The data regarding different welfare schemes like women welfare, children Welfare and welfare of physically handicapped is included in this Section. Apart from this, the information regarding public distribution system is also included in this scheme. The source of information is Dte. Of Social Welfare GNCTD and Department Of Food & Supplies, GNCT of Delhi.

CHAPTER THIRTEEN

POLICE, CRIME & ACCIDENTS

- Police Stations, Police Posts & Police Strength in Delhi
- Crimes in Delhi
- Properties Stolen & Recovered in Delhi
- Accidents in Delhi

CHAPTER THIRTEEN: POLICE, CRIME & ACCIDENTS

There are a variety of criminogenic factors which impact crime. These include socio-economic factors such as unemployment, disparities in income and living conditions, lack of basic civic amenities particularly in jhuggi-jhopries and unauthorized colonies, adverse sex ratio, continual in-migration outpacing the development of infrastructure and availability of working opportunities, a consumer culture with umpteen TV channels continually selling a life style, particularly through advertisements, which many want but cannot legitimately obtain etc. Delhi Police has to deal with challenges resultant from the city being the national capital such as a large number of VIP movements and protest programs which lead to a substantial commitment in terms of manpower.

The data regarding Police Stations, Police Strength, Properties Stolen & Recovered by police, crimes in Delhi and accidents in Delhi are included in this Chapter. The source of information is Commissioner of Police, Delhi.

CONCEPTS AND DEFINITIONS

Some important concepts used in this publication are defined as follows:

- 1. Birth:** “birth” means live-birth or still birth.

- 2. Live Birth:** “live birth” means the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which after such expulsion or extraction, breathers or shows any other evidence of life, and each product of such birth is considered live-born.

- 3. Still-Birth:** “still birth” means foetal death where a product of conception has attained at least the prescribed period of gestation.

- 4. Birth Rate:** Birth Rate acts as an index of the relative speed at which additions are being made to the population through child-birth. It is only a live birth that signifies an addition to the existing population, excluding still births.

The annual birth rate is defined as:

$$\text{Birth Rate} = \frac{\text{No. of Births in a year}}{\text{Mid-year Population}} \times 1000$$

- 5. Death Rate:** The death rate for a given year tells us at what rate deaths have depleted the population over the course of the year.
The death rate, which measures the decrease in a population due to deaths, is perhaps the most widely used of any vital statistics rate because of its value as an index in numerous demographic & public health problems.

The Annual Death Rate is defined as :

$$\text{Death Rate} = \frac{\text{No. of Deaths in a Year}}{\text{Mid-year Population}} \times 1000$$

- 6. Infant Mortality Rate:** Infant mortality rate serves as one of the best indices to the general “healthiness” of a society. It is similar to age-specific death rate for infants under 1 year of age. The annual infant mortality rate is defined as :

$$\text{Infant Mortality Rate} = \frac{\text{No. of deaths under 1 year of age which occurred among the population}}{\text{No. of live births which occurred among the population}} \times 1000$$

7. Maternal Death Rate: Maternal death rate is defined as maternal deaths per thousand live births.

$$\text{Maternal Death Rate} = \frac{\text{No. of Maternal Deaths}}{\text{No. of live births}} \times 1000$$

8. Employed and Unemployed: According to usual status approach, (with a reference period of 365 days) adopted by National Sample Survey Organization (NSSO) a person is considered as working or employed if he/she is engaged relatively for a longer time, during the reference period of last 365 days in any one or more of the work activities. He/she was considered as seeking or available for work or unemployed if he/she was not working but was either seeking or available for work for a relatively longer period of the specified reference period.

9. Own Account Establishment (OAE): OAE is an establishment having no hired worker and is owned and operated with the help of household members only.

10. Labour force Participation Rate: Labour force comprises of employed and unemployed and the number of such persons per 1000 persons in the population constitutes its rate.

11. Unemployment Rate: Unemployment rate refers to number of persons unemployed per 1000 persons in the Labour Force.

12. Employment Rate: Employment rate refers to number of persons employed per 1000 persons in the Labour Force.

13. Main worker: A person who has worked for a major part of the year preceding the date of enumeration, i.e. one who was engaged in any economically productive activity for 183 days or more, i.e. six months or more, in previous year.

14. Marginal worker: A person who has done some work in the year preceding the date of enumeration but does not qualify to be called a 'main worker' i.e. period of work is less than 183 days.

15. Non-worker: A person who has not worked at all in the year preceding the date of enumeration.

16. Total fertility Rate: TFR measures average number of children born to a woman during her entire reproductive period.

17. Gross State Domestic Product: GSDP is a measure in monetary terms of the volume of all goods and services produced by an economy during a given period of time accounted without duplication.

18. Net State Domestic Product:

$$\text{NSDP} = \text{GSDP} - \text{Consumption of fixed capital (depreciation)}$$

19. Dependency Ratio: A measure showing the number of dependents (aged 0-14 and over the age 65) to the total population (aged 15-65). Also referred to as the “total dependency ratio”.

Calculated by:

$$\text{Dependency Ratio} = \frac{\text{No. of Dependents}}{\text{Population (ages 15-64)}} \times 100\%$$

20. Literacy and Education Literate: A person who can read and write in any language is literate. A person who can merely read but cannot write is not literate. It is not necessary that the person should have received any formal education or should have passed any minimum educational standard. All children of age below seven years have been treated as illiterate even though some of them may be attending schools and may be able to read and write a few words.

21. Literacy rate: Literacy rate of the population is defined as the percentage of illiterates in the age group of seven years and above. For different age groups the percentage of illiterates in that age group gives the literacy rate.

22. Gross Enrolment Ratio: Gross Enrolment ratio measures what percentage of the total population in the relevant age-group is being covered by the various educational programmes being run in the country, i.e.

$$\text{Gross Enrolment Ratio at stage I} = \frac{\text{Enrolment at stage I}}{\text{Population in the age group corresponding to the I stage}} * 100$$

Two stages are: primary (Classes I-V) and middle (Classes VI-VIII).

The corresponding age-group for these stages are 6-10 years and 11-13 years respectively. Therefore, gross enrolment ratio for primary stage (I-V) is

$$\text{Gross Enrolment Ratio for primary stage (I-V)} = \frac{\text{Total Enrolment in Classes I-V}}{\text{Total Population in the age group 6-11 years}} * 100$$

While interpreting these figures it should be noted that there may be many students outside the age group 6-11 enrolled in classes’ I-V. Therefore, enrolment ratios in some age groups can be more than 100.

23. Dropout rate: Dropout at primary stage during a given year is defined as the ratio of the difference of enrolment in class I in the fourth year preceding and the enrolment in class V during the year to the enrolment in the class I in the fourth year preceding. In mathematical terms, these rates for primary (I-V), middle (I-VIII) and secondary (I-X) stages are explained below:

$$\text{Enrolment in class I preceding four year (i.e. 1987-88)}$$

Drop out rates at Primary stage during 1991-92	=	$\frac{\text{minus Enrolment in class V during the year (1991-92)}}{\text{Enrolment in class I preceding four year (i.e. 1987-88)}} \times 100$
Drop out rates at Elementary stage during 1991-92	=	$\frac{\text{minus Enrolment in class VIII during the year (1991-92)}}{\text{Enrolment in class I preceding 7 year (i.e. 1984-85)}} \times 100$
Drop out rates at Secondary stage during 1991-92	=	$\frac{\text{minus Enrolment in class X during the year (1991-92)}}{\text{Enrolment in class I preceding 9 year (i.e. 1982-83)}} \times 100$
